

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

BPER International SICAV - Global Convertible Bond EUR, a sub-fund of BPER International SICAV (the "Fund"), Class P (ISIN: LU0179154363)

This sub-fund is managed by UBS Fund Management (Luxembourg) S.A., which is a member of the UBS Group.

Objectives and investment policy

The sub-fund invests in global convertible bonds. The sub-fund is for investors wishing to participate in the growth of the stock market, but requiring a certain level of security. A convertible bond allows on the one hand side to benefit from the appreciation of the stock markets due to the increased value of the conversion right embedded in a convertible bond and on the other hand to benefit from the security of a bond investment in times when the stock markets are less positive. The sub-fund may invest no more than 10% of its assets in other undertakings for collective investment in transferable securities ("UCITS") or undertakings for collective investment ("UCI"). The sub-fund may invest no more than 20% of its net assets in fixed-income instruments denominated in RMB and traded on the China Interbank Bond Market ("CIBM"), through Bond Connect or the RQFII quota granted to an entity of the UBS Group. This sub-fund may hold liquid assets on an ancillary basis. The currency exposure of this sub-fund is hedged into EUR.

The sub-fund is actively managed in reference to the Thomson Reuters Global Convertible Index - Global Vanilla Hedged EUR. The benchmark is used for portfolio composition, performance comparison and investment risk management purposes. Even though the portfolio may partially be invested in the same

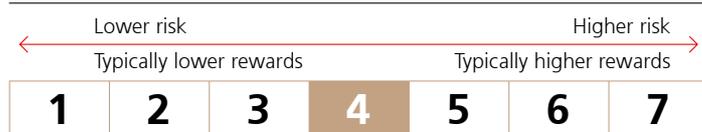

instruments with the same weightings as the benchmark, the portfolio manager may compose the sub-fund's portfolio at his own discretion and is not bound to the benchmark. The portfolio manager may especially invest at his own discretion in securities of issuers, who are not contained in the benchmark. He may furthermore decide to deviate from the benchmark in terms of sector weightings in order to benefit from investment opportunities. In times of high market volatility, the performance of the sub-fund may deviate significantly from the benchmark.

Investors may demand to redeem their units every normal bank business day in Luxembourg.

The income in respect of an accumulation share class is not distributed but is retained in the sub-fund.

Recommendation: This sub-fund may not be appropriate for investors who plan to withdraw their money within 5 years of investment.

Risk and reward profile

More about this rating

- The rating is based on price volatility over the last five years.
- Past data used in calculating the SRRI may not be a reliable indication of the future risk profile.
- The rating is not guaranteed to remain unchanged and the categorisation may shift over time.
- The lowest rating does not mean a risk-free investment. The differences between ratings are not based on a simple scale. 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 2 and 3. The rating is not a target and the investment strategy is not managed to the rating. The rating is an absolute indicator of risk.

Why is this fund in Category 4?

The sub-fund invests in convertible bonds. The sub-fund's value may fluctuate due to equity exposure, interest rates or credit quality. This requires corresponding risk tolerance and capacity. The value of a unit may fall below the purchase price.

Further material risks:

- Convertible bonds are usually considered as carrying significant credit risk
- The sub-fund may use derivatives which can reduce investment risks or increase risks (a.o. risk of failure of a counterparty).
- No capital guarantee exists for this product, so investors could lose the whole of their investment.
- A significant portion of the sub-fund may be invested in less liquid instruments whose prices could fluctuate in certain market conditions.

Charges

The charges you pay are used to pay the costs of running the sub-fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	3.00%
Exit charge	0.00%
Conversion charge	0.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	1.89%
Charges taken from the fund under certain specific conditions	
Performance fee	none

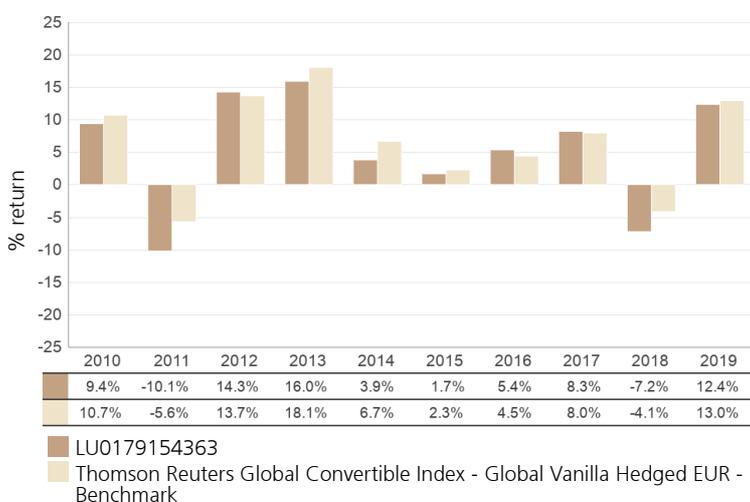

The **entry charge** shown is a maximum figure. In some cases you might pay less – you can find this out from your financial adviser.

These **ongoing charges** are the actual charges over the last 12 months. They can vary from year to year. They do not include:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information, please see the charges section of the fund's prospectus, which is available at www.bper.it.

Past performance

Performance in the past is not a reliable indicator of future results

The chart shows the class's investment returns calculated as percentage year end-over-year end change of the class net asset value in the share class currency. In general any past performance takes account of all ongoing charges, but not the entry charge.

The class was launched in 2003.

The past performance is calculated in EUR.
