

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

BPER International SICAV - Global Bond, a sub-fund of BPER International SICAV (the "Fund"), Class P (ISIN: LU0085741626)

This sub-fund is managed by UBS Fund Management (Luxembourg) S.A., which is a member of the UBS Group.

Objectives and investment policy

This sub-fund aims to invest in global bonds or other fixed and floating rate securities issued predominantly by investment grade rated governments, government agencies and supra nationals, including emerging markets. The sub-fund may also invest in corporate bonds and may hold up to 10% of its Net Asset Value, in securities rated either lower than "BBB-" by S&P or "Baa3" by either Moody's or by another internationally recognized rating service or determined to be as similar by the Portfolio Manager. Investment in higher yielding securities entails the risk of an issuer's inability to meet principal and interest payments on its obligation and the risk of price volatility due to factors such as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity.

The sub-fund is actively managed in reference to the Bloomberg Barclays Global Aggregate TR (CHF hedged) Index. The benchmark is used for portfolio composition and performance comparison purposes. The portfolio manager may invest at his own discretion in securities of issuers, who are not contained in the benchmark. He may furthermore decide to deviate from the benchmark in terms of sector weightings in order to benefit from investment

opportunities. In times of high market volatility, the performance of the sub-fund may deviate significantly from the benchmark.

Investors may demand to redeem their units every normal bank business day in Luxembourg.

The income in respect of an accumulation share class is not distributed but is retained in the sub-fund.

Recommendation: This sub-fund may not be appropriate for investors who plan to withdraw their money within 3 years of investment.

Risk and reward profile

More about this rating

- The rating is based on price volatility over the last five years.
- Past data used in calculating the SRRI may not be a reliable indication of the future risk profile.
- The rating is not guaranteed to remain unchanged and the categorisation may shift over time.
- The lowest rating does not mean a risk-free investment. The differences between ratings are not based on a simple scale. 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 2 and 3. The rating is not a target and the investment strategy is not managed to the rating. The rating is an absolute indicator of risk.

Why is this fund in Category 4?

The sub-fund is exposed in fixed income assets. The risk category is therefore driven by interest rate and credit spread fluctuations.

Further material risks:

- Investment in fixed income securities are usually considered as carrying significant credit risk (i.e. potential loss due to failure of issuer).
- The sub-fund makes use of derivatives which can reduce investment risks or increase risks (a.o. risk of failure of a counterparty).
- No capital guarantee exists for this product, so investors could lose the whole of their investment.
- A slight portion of the sub-fund may be invested in less liquid instruments whose prices could fluctuate in certain market conditions.
- Pronounced fluctuations in price are characteristic of emerging economies. Other characteristics include specific risks such as lower market transparency, regulatory hurdles, illiquidity of markets as well as political and social challenges.

Charges

The charges you pay are used to pay the costs of running the sub-fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	3.00%
Exit charge	0.00%
Conversion charge	0.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	1.21%
Charges taken from the fund under certain specific conditions	
Performance fee	none

The **entry charge** shown is a maximum figure. In some cases you might pay less – you can find this out from your financial adviser.

These **ongoing charges** are the actual charges over the last 12 months. They can vary from year to year. They do not include:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information, please see the charges section of the fund's prospectus, which is available at www.bper.it.

Past performance

Performance in the past is not a reliable indicator of future results

The chart shows the class's investment returns calculated as percentage year end-over-year end change of the class net asset value in the share class currency. In general any past performance takes account of all ongoing charges, but not the entry charge.

21/03/2013: Change of investment policy, performance was achieved under conditions which no longer apply.

The class was launched in 1998.

The past performance is calculated in EUR.
