BPER International SICAV - Equity North America, a sub-fund of BPER International SICAV (the "Fund"), Class P (ISIN: LU0085741469)

This sub-fund is managed by UBS Fund Management (Luxembourg) S.A., which is a member of the UBS Group.

Objectives and investment policy

The sub-fund invests at least two-thirds in stocks of companies domiciled in the USA or whose principal business activity is in the USA. Investments are largely made in companies which enjoy a competitive advantage and/or can demonstrate above-average potential profit growth. The sub-fund may invest one third of its net assets in other countries. Up to 25% of the net assets in convertible and warrant-linked instruments whose warrants entitle the holder to subscribe to securities, and up to 15% of the net assets in bonds and similar investments as well as in money market instruments. In addition, the sub-fund may buy or sell futures and options on financial instruments.

The sub-fund is actively managed in reference to the Russell 1000 Growth. The benchmark is used for portfolio composition, performance comparison and investment risk management purposes. The portfolio manager may however compose the sub-fund's portfolio at his own discretion and is not bound to the benchmark, neither in the selection of equity shares nor in terms of their weightings.

Investors may demand to redeem their units every normal bank business day in Luxembourg.

The income in respect of an accumulation share class is not distributed but is retained in the sub-fund.

Recommendation: This sub-fund may not be appropriate for investors who plan to withdraw their money within 5 years of investment.

Risk and reward profile

More about this rating

- The rating is based on price volatility over the last five years.
- Past data used in calculating the SRRI may not be a reliable indication of the future risk profile.
- The rating is not guaranteed to remain unchanged and the categorisation may shift over time.
- The lowest rating does not mean a risk-free investment. The differences between ratings are not based on a simple scale. 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 2 and 3. The rating is not a target and the investment strategy is not managed to the rating. The rating is an absolute indicator of risk.

Why is this fund in Category 6?

This sub-fund invests mainly in North American stocks across various sectors and may be subject to high fluctuations in value. The risk category is therefore driven by equity market fluctuations.

Further material risks:

- The sub-fund may use derivatives which can reduce investment risks or increase risks (a.o. risk of failure of a counterparty).
- No capital guarantee exists for this product, so investors could lose the whole of their investment.
- A slight portion of the sub-fund may be invested in less liquid instruments whose prices could fluctuate in certain market conditions.
