BPER International SICAV - Currency Diversifier, a sub-fund of BPER International SICAV (the "Fund"), Class P (ISIN: LU0895813110)

This sub-fund is managed by UBS Fund Management (Luxembourg) S.A., which is a member of the UBS Group.

Objectives and investment policy

The sub-fund invests in money market instruments, government bonds and quasi-government bonds. It also invests in corporate bonds that typically have between one and three years to maturity if good opportunities are identified. These bonds are mainly in currencies of smaller developed countries with relatively good credit ratings. The resulting currency exposure is not hedged and is the sub-fund's main source of returns.

Most of the sub-fund assets are invested in bonds from issuers with very good credit ratings. The bonds are fairly sensitive to interest rates, which means that their prices respond moderately to changes in interest rates.

The sub-fund is actively managed in reference to a composite benchmark with several ICE BofA Governments 1-3 Years Indices having different local currency exposure. The composite benchmark is used for portfolio composition and performance comparison purposes. Even though the portfolio may partially be invested in the same instruments with the same weightings as the benchmark, the portfolio manager may compose the sub-fund's portfolio at his own discretion and is not bound to the benchmark. The portfolio manager may especially invest at his own discretion in securities of issuers, who are not contained in the benchmark. He may

furthermore decide to deviate from the benchmark in terms of sector weightings in order to benefit from investment opportunities. In times of high market volatility, the performance of the sub-fund may deviate significantly from the benchmark.

Investors may demand to redeem their units every normal bank business day in Luxembourg.

The income in respect of an accumulation share class is not distributed but is retained in the sub-fund.

Recommendation: this sub-fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and reward profile

More about this rating

- The rating is based on price volatility over the last five years.
- Past data used in calculating the SRRI may not be a reliable indication of the future risk profile.
- The rating is not guaranteed to remain unchanged and the categorisation may shift over time.
- The lowest rating does not mean a risk-free investment. The differences between ratings are not based on a simple scale. 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 2 and 3. The rating is not a target and the investment strategy is not managed to the rating. The rating is an absolute indicator of risk.

Why is this fund in Category 4?

The sub-fund is exposed in fixed income assets. The risk category is therefore driven by interest rate and credit spread fluctuations.

Further material risks:

- Investment grade bonds are usually considered to carry low to medium credit risk (i.e. potential loss due to failure of issuer).
- The sub-fund may use derivatives which can reduce investment risks or increase risks (a.o. risk of failure of a counterparty).
- No capital guarantee exists for this product, so investors could lose the whole of their investment.
- A slight portion of the sub-fund may be invested in less liquid instruments whose prices could fluctuate in certain market conditions.

Charges

The charges you pay are used to pay the costs of running the sub-fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	3.00%
Exit charge	0.00%
Conversion charge	0.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	1.19%
Charges taken from the fund under certain specific conditions	
Performance fee	none

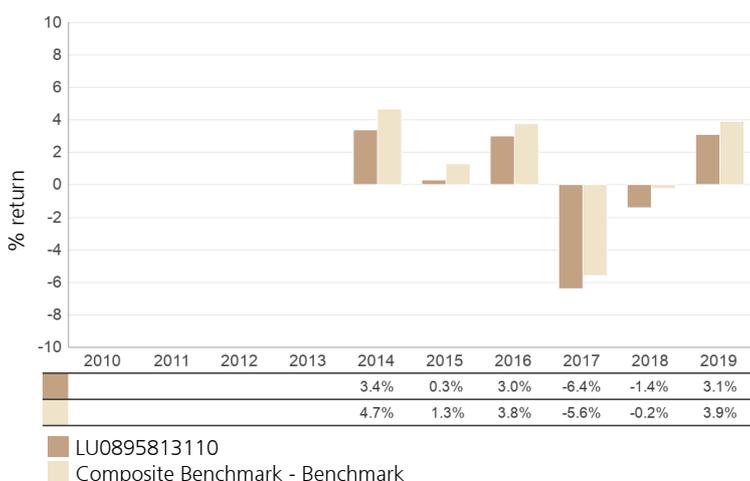

The **entry charge** shown is a maximum figure. In some cases you might pay less – you can find this out from your financial adviser.

These **ongoing charges** are the actual charges over the last 12 months. They can vary from year to year. They do not include:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information, please see the charges section of the fund's prospectus, which is available at www.bper.it.

Past performance

Performance in the past is not a reliable indicator of future results

The chart shows the class's investment returns calculated as percentage year end-over-year end change of the class net asset value in the share class currency. In general any past performance takes account of all ongoing charges, but not the entry charge.

The class was launched in 2013.

The past performance is calculated in EUR.
