## What are the risks and what could I get in return?

### Indicator

The risk indicator assumes you keep the product for 4 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level. The past may be a poor predictor of the future and, hence, the actual risk of losing money may vary significantly.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

The product may be exposed to further risk factors such as operational, political and legal risks which are not included in the summary indicator. Please refer to the prospectus for more detail.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

### What happens if UBS Fund Management (Luxembourg) S.A. is unable to pay out?

Losses are not covered by an investor compensation or guarantee scheme. Furthermore, with respect to UBS Europe SE, Luxembourg Branch as depositary of the Fund, which is responsible for the safekeeping of the assets of the Fund (the "Depositary"), there is a potential default risk if the assets of the Fund held with the Depositary are lost. However, such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary is liable to the Fund or to the investors of the Fund for the loss by the Depositary or one of its delegates of a financial instrument held in custody unless the Depositary is able to prove that the loss has arisen as a result of an external event beyond its reasonable control.
